PAM BENSON HEALTHCARE CORPORATION | QUALITY - RELIABILITY - BETTER CARE WORLDWIDE

Embracing change is the foundation of progress.

As we transition into the next era, we remain committed to pushing boundaries, redefining possibilities, and driving continuous innovation. Our evolution is fueled by adaptability, cutting-edge technology, and an unwavering pursuit of excellence—ensuring we stay ahead in a rapidly shifting landscape.

COMPANY PROFILE

PAM BENSON HEALTHCARE CORPORATION

Pam Benson Healthcare Corporation is a U.S.-based healthcare solutions company serving hospitals, clinics, laboratories and medical professionals through international equipment sourcing, distribution, installation coordination and after-sales support. Our portfolio connects healthcare providers with practical technologies for neonatal care, patient monitoring, anesthesia, ultrasound imaging, respiratory care, cardiology, operating rooms, hospital furniture and obstetric care.

OUR MISSION

Improve access to dependable medical technology while supporting safe implementation, responsive service and long-term clinical value.

OUR COMMITMENT

Professional communication, transparent procurement, quality-focused product selection and reliable support throughout the equipment lifecycle.

GLOBAL REACH

International supplier relationships and logistics experience supporting healthcare projects in the United States, Africa and other global markets.

Patient Monitor Recipe Management History Setting Quit

Equipment Characteristics

- » Suitable for use in many departments like ICU, CCU, oncology, emergency departments
- » Efficiency display with 4.3" size for clear view
- » High capacity to store history logs
- » Compact design, easy to use and safe

PM-200

PM-200

Respiratory

Equipment Characteristics

- » Built for stable performance in high-demand clinical settings
- » Compliance with the clinical standards of different applications, emergency, ICU, transport
- » Built with the latest technology, highly accurate and safe
- » Include a variety of ventilation modes

Cardiology

PM

Equipment Characteristics

- » Complete portfolio of products provides solutions for all your needs in cardiology
- » Advanced equipment of latest technology, easy to use, highly accurate and safe
- » Portable and compact equipment with modern designs
- » The high quality of equipment and advanced guarantee ensure durability and reliability

PM-100+

PM-12 Max

Operating Room

Equipment Characteristics

- » Solutions of high quality and durability to operating and delivery rooms
- » Availability of multiple accessories for different surgical applications
- » Superior technology that allows advanced applications
- » Practical designs that meet high safety standards
